## Seedling height varies with age and species. The following is a general guide:

- 3 year old conifer seedlings: 6-20 inches

- 1 & 2 year old conifer seedlings: 4-12 inches 1 year old deciduous seedlings: 6-20 inches 2 year old deciduous seedlings: 8-30 inches
- 1 & 2 year old deciduous small trees and shrubs: 4-20 inches

## In the event of a crop failure species may be substituted.

Seedling losses can result from adverse weather and many other causes beyond our control therefore we do not guarantee seedling survival unless we determine that losses occurred due to our handling procedures. If seedling losses occur after planting, please contact us within the first 30 days so that the cause can be determined.

Information concerning the mature size and recommended use of these species can be obtained by contacting either nursery or from the "Tree Species Information" on our website at http://www.IN.gov/dnr/forestry

Determining the number of seedlings needed. Purpose of Planting	Spacing	Seedlings per acre	Seedling	s per 100 foot	of windbreak
general reforestation	8' x 8'	680			
2 row windbreak	10' x 10'			20	
1 row windbreak	8' x 8'			13
